EXCEPTIONALLY GIFTED AND MOTIVATED STUDENTS looking to pursue graduate studies at the university level are invited to apply to the Graduate Fellowship at the NanoScience Technology Center (NSTC) at the University of Central Florida. Outstanding applicants will receive financial support through NSTC fellowships. The NanoScience Technology Center is a multidisciplinary research center that strives to understand the unique properties of nanoscale materials and the underlying organizational principles of matter at the atomic scale and to apply this knowledge towards the development of nanoscience technology. The NSTC is an integral part of the rapidly growing University of Central Florida, located in the heart of the Florida High Tech corridor and the Metro Orlando area.

www.nanoscience.ucf.edu

Stipend: $32,000 per year
Duration: Four years
Required GPA: 3.6/4.0
Required GRE: 1300/1600
Required TOEFL (if applicable): 104/120
Tuition support: Four years tuition and fees paid

Full-time enrollment for the duration of the fellowship is required. Degrees will be earned in traditional disciplines (physics, chemistry, engineering, optics, computer and biomedical sciences), with a concentration in nanoscience. Applications will be processed by the NSTC and applicants must indicate their disciplines of study.
